# C<sup>4</sup> WORKSHOP CLIMATE CHANGE AND CARBON CYCLE

June 22-24, 2022

CNR Research Area, Pisa, Italy

## **Interactive Laboratories 15:15-18:00**

In this session of interactive laboratories, we aim to identify issues of common interest, such as global changes, climate changes and carbon cycle, addressing them from different points of view.

Participants will be divided into groups and will participate alternating in the three followed proposed laboratories

- Observation and Prediction: two sides of the same coin
- Discovering the Deep
- Walking through the Earth System
