

Guidelines for talks and posters

Connect with the audience. The C⁴ workshop pulls together expertise from different fields including modern carbon cycling, paleo-climate and earth system evolution. The workshop is meant to favour the cross-pollination among fields that traditionally do not exchange with each other. Thus, the language used for your presentation, either as a talk or poster, is expected to be accessible to a wide research community. We strongly encourage you to start your presentation by introducing the topic for a non-expert in your field. Avoid acronyms where possible and make sure that graphics are accessible.

- **Talks:** 12 minutes + 3 minutes for questions. Presentation language: English. Please send your presentation ahead of your talk via email (c4workshop@cnr.it) **no later than June 19th**. If the file is too large to be sent, consider using WeTransfer or similar platforms. For Mac users, we strongly advice to submit your presentation as a pdf if possible.

- **Posters:** each presenter as the chance to give a **2-minute presentation** (i.e., 1 slide, in English) ahead of the poster session (see further details in the final program). Please provide your slide via email (c4workshop@cnr.it) **no later than June 19th**. Poster size: format A0 portrait.

We are committed to an open and welcoming environment for all participants. If you are victim or see any sort of discrimination or harassment at workshops, please immediately contact Dr. Annalisa Iadanza (female) or Dr. Tommaso Tesi (male).
